Contribution ID: **25151**   Type: **Student Competition**

Load-Following Control of a VVER-1000 Reactor Using a Takagi-Sugeno Fuzzy PID Sliding Mode Composite Controller Based on a Validated Nonlinear Multipoint Kinetic Model via Lyapunov Approach

Monday, 3 November 2025 13:35 (7 minutes)

Technical Track

Reactor Physics

Primary author: Mr MENGSITU, Hailemichael Guadie (College of Nuclear Science and Technology, Harbin Engineering University)

Co-authors: Prof. LUAN, Xiuchun (College of Nuclear Science and Technology, Harbin Engineering University); Mr SUN, Hetao (College of Nuclear Science and Technology, Harbin Engineering University); Mr THULU, Fabiano G.D. (Virginia Commonwealth University); Mr MANAN, Abdul (College of Nuclear Science and Technology, Harbin Engineering University); Mr DABA, Mulugeta A. (College of Nuclear Science and Technology, Harbin Engineering University)

Session Classification: Student Competition
